

On January 17, 2017 the extortionist-racketeer arsonist Republican city councilman of Centennial Colorado threatened that he would seize any physical evidence against him that I might have in my possession.

When I stated that I would keep it in a safe deposit box he threatened to obtain it there through identity theft and by employing his accomplices at my bank.

He then threatened to steal this evidence when I moved. I asked how that would happen and he stated that it would be his people who would pack my belongings.

I told him I would pack my own belongings.

He responded to this with a threat to send his inspectors who would make a report of clutter because of the moving boxes temporarily stored on the property.

He threatened to use that report to frame us for the arson which he repeatedly threatened to cause during the two and half hours of extortion.

The extortionist stated that he would be able to get his inspectors on to the property because he would be one of the financiers. On May 17, 2023 we were informed by a notice taped to our door that inspectors from Bellweather Enterprise would be inspecting 5 to 15 random apartments on the property starting at 9AM May 18, 2023.

The extortionist-racketeer arsonist Republican city councilman of Centennial Colorado had threatened multiple times that asbestos planted by his accomplices would be found on the premises and that the property would have to be evacuated. He would take that opportunity to seize evidence, tamper with evidence, and fabricate evidence against me to create the appearance that I was responsible for the contamination.

He threatened to destroy me if I told anyone about the threats he made that day.
